

## Job Specification

<b>Title</b>	Cloud Product Manager
<b>Location</b>	Gothenburg, Sweden
<b>Department</b>	Product Marketing
<b>Reporting to</b>	VP of Product
<b>Purpose of Position</b>	<p>We are looking for a Cloud Product Manager to lead Mentice’s exciting journey into the world of cloud. As a member of the Mentice Product team, you will be responsible for driving strategy, design and implementation of Mentice’s cloud-based solutions. The ideal candidate will shape the future of our product platform and is someone who loves working with cutting-edge technology while at the same time making a positive impact on people’s lives. This position is based at our headquarter in Gothenburg, but working at Mentice you will be part of an amazing group of individuals located all around the world.</p> <p>Main responsible for definition, development and implementation of Mentice’s online services strategy, working closely with a team of Product Portfolio Managers to define and implement our global cloud-based product and service offering within each clinical area.</p> <p>The role provides the opportunity to influence the strategic direction of our cloud-based platform, as well as ensuring efficient delivery of day to day operations.</p> <p>You will drive the product strategy, planning and execution of Mentice’s cloud-based online services by helping to define key areas for immediate success while also planning for long-term growth of the cloud portfolio. An important part of this job will be to envision how these cloud services can best interact with existing offerings to provide a powerful synergy that is unique in the marketplace.</p>
<b>Main tasks and areas of responsibility</b>	<p>Specification of main tasks and areas of responsibility -</p> <ul style="list-style-type: none"> <li>• Lead the design and specification for the Mentice cloud platform</li> <li>• Ownership of cloud services strategy development and execution</li> <li>• Be the in-house expert on Mentice’s online solutions and related products/services</li> <li>• Work closely together with Product Portfolio Managers and Clinical Advisors to define and drive our cloud-enabled product initiatives</li> <li>• Establish and maintain commercial and technical documentation; building and developing the cloud solution business case</li> <li>• Create and maintain documentation on market and product requirements</li> <li>• Building and managing key strategic relationships with third-party service, hosting and product providers; for technical product integration and cloud service delivery</li> <li>• Lead the development of cloud solutions within Mentice for internal/external use</li> <li>• Managing a detailed development backlog using an agile framework</li> <li>• Define and design intuitive cloud user interfaces together with external consultants</li> <li>• Working with R&amp;D throughout the product development cycle to ensure the final product meets requirements and exceeds expectations</li> <li>• Work with the rest of the product management team to develop adequate product packaging and ease-of-use for success in the market</li> </ul>

	<ul style="list-style-type: none"> <li>• Drive the success of the products by teaming with early adopter customers to provide feedback on design requirements, prototypes, and final implementation</li> <li>• Manage live user testing for products including close relationship with beta sites</li> <li>• Act as a source of information and expertise to the R&amp;D department on request, including testing and evaluating products before commercial release</li> <li>• Work with Product Specialist to provide training on developed cloud solutions both internally and externally, especially in conjunction with commercial releases</li> </ul>
<p><b>Competence and requirement</b></p>	<p>The following are required -</p> <ul style="list-style-type: none"> <li>• Engineering/computer science degree, or comparable technical product management or project management experience</li> <li>• 3-4 years in a technical capacity (product management, development)</li> <li>• Experience of designing and deploying online services platforms from scratch</li> <li>• Ideally, background from the healthcare or medical device industries</li> <li>• Experience developing cloud solutions for hospital environments is an extra bonus</li> <li>• You will be passionate about delivering to the highest of standards. Pro-active, adaptable and results driven, as well as a team player who can work under pressure and be able to use your own initiative and motivation to meet deadlines</li> <li>• Working knowledge of managing, documenting and implementing technical product integrations of 3rd party applications for cloud</li> <li>• Experience using JIRA to manage product backlogs is a plus</li> <li>• Personality and ability to work with customer-facing consultancy and beta testing</li> <li>• Excellent written and spoken English communication skills including presentations, note that Swedish is <u>not</u> a requirement for this position</li> <li>• Ability to travel up to 15-20% in conjunction with launches and events</li> <li>• You like to have fun! This is the most important requirement of all.</li> </ul>
