

Job Specification

Title	Senior Software Architect
Location	Gothenburg, Sweden
Department	R&D Department
Reporting to	Henrik Storm
Purpose of Position	<p>Mentice is now looking for a Senior Software Architect to join a great multi-cultural R&D team (we have over 17 nationalities in total and offices in Sweden, USA and Asia) of passionate Software Developers, Hardware Designers and Project Managers.</p> <p>As a Software Architect you will be a central person in our SW Platform team defining, creating and upgrading core components in the Mentice software platform. You will be making high-level design choices in order to define and help to implement new instances of the Mentice software family as we grow into new product segments, while providing technical leadership within the development team.</p>
Main tasks and areas of responsibility	<p>Specification of main tasks and areas of responsibility -</p> <ul style="list-style-type: none"> • Drive the effort around connectivity and cloud integration of current and future Mentice products. Example of applications include managing user data, performance metrics, and virtual patient information. • Support our SW Applications team by designing and building platform components necessary for new product development projects. • Improve our existing general SW platform, making it easier for new developers to learn our system. • Working together with both our Swedish and US developers, combining all knowledge and addressing the needs for the full SW development teams. • Exploring new technologies that supports Mentice future roadmap plans, working with Product Managers to define new Mentice products.
Competence and requirement	<p>The following are required -</p> <ul style="list-style-type: none"> • Proven experience as software architect, plus extensive experience from software development and design/maintenance of complex software systems. In particular, experience from designing connectivity/cloud solutions is necessary. • Project- and team-leading experience. • Excellent interpersonal and communication skills. • Knowledge of Agile methodologies, as well as a background within Healthcare, are considered as a merit. • Very good knowledge of Swedish and English; both verbal and in writing. • <p>The position is based in our HQ office in Gothenburg.</p> <p>For questions regarding the position, please contact Torbjörn Ahlqvist (Director, Product Development) at torbjorn.ahlqvist@mentice.com</p>
